DETAILED ACTION

Response to Amendment

This Office action is responsive to applicant's amendment filed September 14, 2005. Claims 1-4 and 6-33 are pending.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 9-15 and 23-29 rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claimed "test chart" is non-functional descriptive material comprising mere data, which is not executable code, does not program a computer, or cause the computer to perform certain acts. Non-functional descriptive material is non-statutory because it does not constitute a statutory process, machine, manufacture or composition of matter (MPEP 2106.IV.B.1(b)).

Allowable Subject Matter

Claims 1-4, 6-8, 16-22 and 30-33 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Applicant's argument that the prior art does not disclose or suggest the outputting of test chart data having tone-changing areas "where a tone of a color output changes in steps arranged alternately with tone-fixed areas where a predetermined tone of said color is output" (amendment, at pages 13-16), as recited in base claims 1-4, is deemed persuasive.

Base claims 9-12 also recite the above allowable subject matter. However, these claims, directed to a test chart, are deemed to be non-statutory, since the test chart is non-functional descriptive material comprising mere data, as mentioned above.

Conclusion

In view of new grounds for rejection not necessitated by applicant's amendment, this Office action is non-final.
